

Microsoft Privacy Statement Change History

June 2026

We simplify the understanding of how Microsoft uses and protects your data.

Microsoft is committed to making our privacy statement clear and user-friendly. In this update, we've simplified, shortened, and reorganized sections to make information about how we use data easier to read and find. We've also explained how we collect and use data. Overall, these changes are designed to help you better understand how your data is used and your choices.

- We have **reorganized and modified several of our sections** . For example, we:
 - Simplification of wording and use of fewer examples to make the privacy statement shorter and easier to read.
 - **We have moved the information on our Personal Data Security and Personal Data Retention** subsections from the Other Important Privacy Information section to the **How We Use Personal Data** section .
 - We renamed the section "Location of storage and processing of personal data" to " **Storage and processing of personal data**" , and then moved it from the "Other important privacy information" section to the beginning of the privacy statement.
 - We have moved the section **Products provided by your organization – End-user information** to the renamed section **Products for enterprise and developers, and products provided by your organization** .
 - We have moved the information about Microsoft Translator and SwiftKey from **Search and Navigation** to our **Productivity and Communication Products** section .
 - **We have moved information about recording features in Windows to a new Recording** subsection in our **Windows** section .
 - **We have created a new Diagnostic Data** subsection within our **Other Important Privacy Information** section , to consolidate how we approach the use of diagnostic data across multiple products and services.

- We have consolidated the U.S. State Data Privacy section and related parts of the privacy statement into our **Information on U.S. Data Privacy Laws** .
- We have added details on how we respond to the Global Privacy Control browser signal in our **How to access and control your personal data** and **Advertising** sections .
- For the sake of consistency, we have replaced the phrase "interest-based advertising" with " **personalized advertising** " throughout our privacy policy.
- We have clarified the opt-out rights for personalized advertising available on our " **Personalized Ads**" and " **Third-Party Ad Settings** " pages.
- In our **How we use personal data section and in the Microsoft Store** subsection , we have added information on how we use data to provide age-appropriate experiences.
- In our section **How to access and control your personal data** , we have added information on access, export and deletion controls in Microsoft Copilot and Microsoft 365 Copilot.
- We have updated the examples of cookies we commonly use in our **Cookies and Similar Technologies** section , and we have clarified how web beacons are used to deliver and measure ads on third-party platforms.
- We have updated our **Microsoft Account** section to more clearly describe Microsoft accounts, work or school accounts, and third-party accounts, as well as how data associated with your account is used.
- We have moved much of the Xbox-related information from the **Children's Data Collection section to the Xbox** section .
- We have removed references to health-related advertising targeting from our **Advertising** section to avoid confusion with the text outlining our commitment not to use "sensitive data" under applicable data protection laws for the purpose of delivering personalized advertising.
- **We have removed the Speech Recognition Technologies** subsection from our **Other Important Privacy Information** section , and we have provided links, where appropriate, to our page describing how [Microsoft protects privacy in speech recognition technologies](#) .
- We have updated our **Artificial Intelligence and Copilot Features** section , describing how Copilot Health uses information to provide personalized assistance focused on health and well-being.

- **We have consolidated our Enterprise Online Services Terms** subsection , removing references to collected data and instead referring to the Product Terms, the Data Protection Addendum, and the Microsoft Trust Center.
- In our **Microsoft Teams** section , we have specified which information from your profile is visible to other people and when.
- In our **Microsoft Edge** section , we explained how Copilot for Edge works and processes your data, and that it can access page content, tabs, browsing history and capture visual snapshots.
- **We have updated our Windows Location Services** subsection to better clarify how Windows services and applications, as well as third-party applications, can access your location information, and how you can control access to this information.
- We've updated our **Cross-device experiences** subsection in **Windows** to better describe how information can be shared between devices, and how you can enable access to your linked mobile device via Windows Share.
- We have changed the name of our Microsoft Start services to **MSN** throughout the privacy statement.
- We have removed references to **activity history** in Windows, **older versions of Microsoft Edge** , **Internet Explorer** , and **Silverlight** , as they are no longer available or supported.

March 2026

- We have updated the language describing the criteria we use to determine retention periods in **Our Personal Data Retention Policy** .
- We've removed the retention period descriptions from our **Bing** and **Advertising** sections . For more information, see the product documentation and our Personalized [Ads and Offers page](#).
- We have updated the section "**How we use your personal data**" to clarify how we may contact you when you consent to receive marketing communications by telephone.

March 2026

- We have updated the language describing the criteria we use to determine retention periods in **Our Personal Data Retention Policy** .
- We've removed the retention period descriptions from our **Bing** and **Advertising** sections . For more information, see the product documentation and our Personalized [Ads and Offers page](#).

- We have updated the section "**How we use your personal data**" to clarify how we may contact you when you consent to receive marketing communications by telephone.

February 2026

- We have updated our **Advertising** section to clarify how we share data with other companies for advertising purposes.

December 2025

- We have revised the **U.S. State Data Privacy** section to clarify your rights under U.S. state data privacy laws, and how we respond to the Global Privacy Control browser signal.

November 2025

- We have updated our **SwiftKey section** on SwiftKey's OneDrive backup and sync mechanism, replacing SwiftKey Account.
- We have added information to our **Advertising ID** section on cellular plan activation from mobile operator websites, describing the data accessed as part of this service.

October 2025

- We have redesigned our **Artificial Intelligence and Copilot features** section to better explain the "Copilot" services we offer and their features, how these services use data and how you can control the use of your data in certain situations.
- We have removed references to "Copilot Pro" from our Privacy Statement, as their function is covered by **Microsoft 365 Copilot** offerings .
- We have updated our **Bing** section to explain that "Microsoft Copilot for Bing" is now "Copilot Search".
- We have added information to our **Windows** section about Circle to Act, a service offered by PC Manager in certain markets.

September 2025

- We have updated our **Contact Us** section to clarify how you can contact our privacy team.
- We have described in the **Personal Data We Collect** section how we collect biometric data based on the products and features you use in certain Microsoft products, as well as your consent.

- We have included information about your right to be informed about the collection and use of your personal data in the section **How to access and control your personal data** .
- We have specified how we protect data when it is transferred to other countries/regions in the section **Where we store and process personal data** .
- We have detailed our data sharing with our subsidiaries and affiliates in various sections of the Privacy Statement, including the **Advertising , Xbox** and **U.S. State Data Privacy** sections .

July 2025

- We have updated our **How to contact us** section to clarify how relatives can find more information about accessing their family members' Microsoft accounts through our support and privacy requests page.
- We have included more information in our **Artificial Intelligence and Microsoft Copilot Features** section on where users can find information in our privacy statement regarding Copilot features on Xbox.
- We have detailed in our **Children's Data Collection** and in our Xbox sections how **Xbox** uses data in its AI-enhanced features.
- **The Xbox** section has been updated to provide information on the age and identity verification features required to access certain Xbox services or features.

May 2025

- We have provided additional information in the Security section of our **How we use personal data** section on how we prevent and detect child exploitation.
- **We have revised the Cookies and similar technologies** section to better indicate that some cookies may be used for advertising purposes with your consent.
- We have updated the **How to Contact Us** section to clarify the response time to your questions or concerns, and to include information on how people in Brazil can contact us under the LGPD.
- In the **Location Services and Recording** section , we explained how Windows can use your device's location data, how you can control your location settings and features, and how you can view or delete your location data.
- We have removed references to Skype services that will no longer be available or supported.

March 2025

- We have clarified our section on **US state data privacy** regarding the Global Privacy Control browser signal.
- We have reviewed our **Microsoft Teams** and **Skype** sections which provide information on how users can communicate and connect with each other, and view their data using one of these services.
- We have added a new **Windows AI Features** section , which describes our **Click Actions** and **Find** features .

January 2025

- We have updated the **Artificial Intelligence and Features sections of Microsoft Copilot** and **Microsoft 365, Office and other productivity apps** to clarify Copilot features in available Microsoft 365 subscriptions.

November 2024

- We have updated our **Windows Diagnostics** section to mention that our "Personalized Experiences" feature is being replaced by "Personalized Offers", and to provide more details on how these offers use information to provide personalized advice, advertisements, and other recommendations.
- We have updated our **Windows sync and backup settings** section to clarify that these settings are available with your Microsoft account.

September 2024

- In the **Personal Data We Collect** section , we have specified that we may receive data from Microsoft subsidiaries or affiliates.
- We have added language to the sections **Personal Data We Collect, Reasons Why We Share Personal Data, U.S. State Data Privacy** and **Advertising** , with wording clarifying our advertising practices and the people with whom we share information for those purposes.
- We have updated our **Cookies and** similar technologies section to include additional session cookies that we may use for load balancing purposes.
- We have added information to the **US State Data Privacy** section to clarify that we do not engage in "profiling," which is the use of personal data for automated decision-making producing legal or similarly significant effects.
- We have specified in the **US State Data Privacy** section that we may obtain subscription and license data from third-party storefronts and platforms on which our products are purchased, and we have clarified the purposes of processing this data.

- We have added a new **Microsoft Launcher** section explaining the data used by certain Microsoft Launcher features.
- We have added information in the **Cross-device experiences** section of our Windows section to explain how to access files from your mobile device in File Explorer.

August 2024

- We have updated our **Use of Personal Data** section to clarify that we may use data to develop and train our AI models.
- We have also specified the objectives and legal bases for the processing of personal data in the section **Use of personal data**.
- **We have refined the US State Data Privacy** section to explain in more detail your rights under the relevant US state data privacy laws, and how you can exercise your data-related rights with us.

June 2024

- We have created a new section on **artificial intelligence and Microsoft Copilot capabilities**, in order to better describe our Copilot offerings, and we have moved our old "Artificial Intelligence" section into this new section.
- We have updated our **Use of Personal Data** section to clarify our use of data for research purposes.
- In our section **Reasons why we share personal data**, we explain how we share this data when necessary, to protect the security of our customers, organizations and the public.
- We have modified the **Children's Data Collection** and **Microsoft Family** sections to provide more details on how child accounts are added to a parent's family group.
- The section **on collecting data from children** has been updated to clarify how Xbox-specific parental control settings apply and how data is used when a child uses an Xbox.
- We have modified our **Diagnostics** section under Windows to note when diagnostic data is collected and sent to Microsoft.
- We've added a new **Cross-device experiences** section to describe how to access your mobile device from your PC using your Microsoft account.
- **We have updated the Web browsers — legacy versions of Microsoft Edge and Internet Explorer** section to better describe how to access your data on all browsers connected to your devices and how information is shared with your default search provider.

- We have specified which multimedia content can be played by **legacy Windows Media Player** when you use this service to play and access media.
- We've updated the **Xbox** section to better describe how data is used to provide our services and curated experiences.
- Under **Microsoft Start**, we have included information about how your location is used when you access the weather app.
- We have removed references to services that will no longer be available or supported, such as Cortana, Spend, and sharing Windows location information with location service partners.

April 2024

- We have updated our **Skype** and **SwiftKey** sections to include additional information about the camera features of these services.
- We have specified the data we collect through your use of **SwiftKey**, and how you can control your personal data preferences through your SwiftKey account.
- We have added additional information on how the **Feedback Hub** determines which installed apps it can provide feedback on.
- We have added a new **Help** section to describe the technical support function of Help and the data used.
- We've added the **Media Player** and **Movies & TV** sections to the Windows Apps section, and we've explained how they use data to provide you with their experience.
- We have updated the name of Windows Media Player to **Legacy Windows Media Player**.
- We have included information for people in Japan about the handling of information under local laws.

March 2024

- We've updated our **Microsoft 365, Office, and other productivity apps** section to include information about certain productivity apps, such as Whiteboard, To Do, and Sticky Notes. We also explain that some apps may use features on your device, such as your microphone and camera, depending on your Windows privacy settings.
- We've updated our **Outlook** section to describe how certain features use device features such as your microphone or location.

- We've added a new **Surface** section to describe how we collect and use diagnostic data from Surface devices and accessories, as well as the Surface app.
- We have updated our **Windows** section to describe your ability to customize and manage different aspects of Windows through your **Windows Settings**.
- We have updated the **Feedback Hub** description to clarify how it determines which products and apps it can provide feedback on, and how Feedback Hub uses certain HoloLens device resources when you choose to share audio, photos, or recordings as part of your feedback.
- We have moved our **Subtitles** and **Narrator** descriptions to our **Windows** section.
- We have updated **Phone Link – Link with Windows** to provide additional details on Phone Link's features and how you can use it with Android and iPhone devices.
- In the **Windows sync and backup settings** section, we explained how you can delete previously backed-up data from your Microsoft account.
- We have made several updates and additions to the **Windows apps** section of our **Windows** section to describe how some of our apps access and use various device features and data, depending on the app and your usage.
- We've added sections on the Clock app, Microsoft Journal, Mobile Plans app, Microsoft PC Manager, Snipping Tool, Audio Recorder app, and Microsoft Clipchamp, and describe how they use your device information and/or features.
- We've also updated the Maps app, the Camera app, the Mail and Calendar app, and the Windows Operator Messages sections (formerly Microsoft Messages).
- We have included information in our **Xbox** section on how players can use their device's features to enhance their gaming experience, including via Windows Game Bar.

February 2024

- We have updated our **Cookies and similar technologies** section to include an additional type of cookie used on our sites.
- We have made updates to several sections of our Privacy Statement regarding artificial intelligence and our Copilot features, including **Copilot Pro, Copilot in Bing and Copilot in Edge**, to better describe how Copilot works in our services.

- We have updated our **Windows Activity History** section to clarify how active history data is stored and your controls over your active history data.

October 2023

- We have updated the references to Azure Active Directory (AAD) to reflect its new name, **Microsoft Entra ID**.
- We have modified our **collection of children's data** and **Xbox sections** to clarify how Xbox collects and uses user data, including diagnostic data and data for curated experiments.
- We have updated our section **Where we store and process personal data** regarding the location of storage and processing of personal data.
- We have added new information about our responsibilities regarding onward transfers under the **EU-US, UK and Swiss-US extensions. Data privacy frameworks**.
- We have included information about the Swiss representative of Microsoft Ireland Operations Limited and updated the contact details of the Microsoft data protection officer in Canada, in the **How to contact us** section.
- **We have modified the Microsoft Teams** section to explain that information may be shared with our enterprise customers when you use Microsoft Teams to interact with a customer's end users who are using their school or work account.
- We have made changes to the **Phone Link – Link with Windows** section to provide additional information about how the Phone Link service works and functions.

August 2023

- We have made updates throughout the Privacy Statement and added a new **Artificial Intelligence** section to improve our disclosures regarding our development and use of artificial intelligence ("AI").
- We have updated the **Bing** section to provide you with information about Bing Chat, an AI-enhanced web search feature, including how you can view and manage your recent activity with Bing Chat.
- **We have completed the Reasons why we share personal data** section to explain how we may share receipts for purchases from Microsoft with Microsoft account holders who use the same payment method.
- We have made changes to our section **on collecting data from children** to clarify when we will ask for parental or guardian consent to collect information from their child.

- We've modified the **Microsoft Edge** section to refine how you can control the sharing of your Microsoft Edge browsing activity, including when using Bing Chat.
- **The Security and Safety Features** section has been updated to explain in more detail how Microsoft Defender SmartScreen can use information to identify security threats related to suspicious websites or applications.
- We have updated our disclosures regarding our adherence to **the EU-US, UK and Swiss-US data protection frameworks**.
- We explained in our **How to contact us** section how people can contact Microsoft to exercise their data privacy rights.

July 2023

- We have prepared our **Washington State Consumer Health Data Privacy Policy** and made changes to our Privacy Statement to detail our data processing and the rights of individuals under the Washington State My Health and My Data Act ("MHMDA").

June 2023

- We have updated our **Cookies and similar technologies** section to better explain the types of cookies we may use when you use our sites, products, or services.
- We have updated our **Advertising** section to provide more information on how you can opt out of receiving personalized ads from Microsoft.
- We have made updates to our **Connected Mobile – Link to Windows** section to provide additional information on how Connected Mobile – Link to Windows works, as well as the data that can be used and transferred between your Windows devices and your Android mobile phone.

April 2023

- **The Microsoft Family** section has been added to clarify how parental control features collect and use data, and how individuals can control the use and sharing of their data with their family group.
- We have modified the section **on Collecting Data from Children** to include links to other related sections of the Privacy Statement regarding information about children, including the new Parental Controls section.
- We have updated the **Advertising** section to clarify the partners we work with and may share data with for advertising purposes.

February 2023

- We have updated the **reasons why we share personal data and the US State Data Privacy** sections to clarify the relationship between "sharing" and personalized advertising purposes.
- We have made changes to our **Children's Data Collection** section to give parents and guardians more information on how they can access and delete their children's information.
- We explained how to classify information and interactions from chatbots, and how this information differs from human conversations.
- We have specified the applications and programs that are part of Bing.

December 2022

- We have updated the privacy statement to reflect changes we are making to comply with U.S. state privacy laws and have changed the name of the section relating to the **California Consumer Privacy Act** to **the U.S. state data privacy law**.
- We have updated the **Microsoft Account** section to clarify how Microsoft makes the information saved to your account available on Microsoft products when you sign in.
- We have clarified the sections **on Collecting Data from Children** and **Xbox** to provide additional information on Xbox's anti-fraud and anti-cheat measures.
- We have completed the **How to Contact Us** section to add a contact phone number for residents of Canada.
- Changes have been made to the **Windows** section to clarify the difference between the available versions of the Photos app.

September 2022

- We have updated our **Reasons why we share personal data** section to clarify our sharing of Push notification data for Microsoft products or applications on non-Windows devices.
- We have updated references to certain MSN products in the Privacy Statement to refer to **Microsoft Start** and have explained the services offered by Microsoft Start.
- We have included the contact details of **Microsoft's data protection officer in Canada**.

- In our **Online Business Services** section , we have specified the purposes for which Microsoft may process personal data as a data controller, in accordance with our DPA Standard Products and Services.
- We've updated the **Microsoft Edge** section with additional information describing how Edge syncs browser data, migrates privacy choices across your connected devices when you sign in to your Microsoft accounts, and uses search data to improve Microsoft services.
- We have modified the **Location Services and Recording** section to detail how desktop applications, web experiences, or third-party applications can determine your device's location.
- The **Security and Safety Features** section has been revised to clarify Microsoft Defender SmartScreen services and to add information about Intelligent Application Control.
- We have made changes to the **Speech, Voice Activation, Inking and Input** section to further clarify how we protect your voice recordings when using our speech recognition technologies, and to provide details on our voice access and client word list features.
- **We have revised the Photos app** section to outline the different features of the Photos and Photos Legacy apps, and how each app can process your photo data.
- We have added the section on **Live Captions** to describe how audio and voice data can be processed to generate captions from audio data containing speech.

June 2022

- We have updated the section **Our use of cookies and similar technologies** to clarify and better communicate when we may ask for your consent before installing optional cookies.

April 2022

- We have updated the section **Where we store and process personal data** in response to the Japanese Personal Information Protection Act.
- We have changed the **Your Phone** section to **Phone Link** to reflect the new name of the Windows apps.

March 2022

- We have made changes to the **How to access and control your personal data** section to better communicate how Microsoft handles personal data.

- We have updated the **Skype** section to provide additional information on how users can communicate with emergency call service providers in the United States when using Skype.
- **The Microsoft Teams** and **Skype** sections have been updated to include additional information on how contact data is processed and announcements to non-users.

December 2021

- We have modified the **section on the personal data we collect** in order to provide more transparency regarding the sources and processing of third-party data.
- The section **"How we use personal data"** has been expanded to provide additional details on how Microsoft Corporation works to protect its products and consumers.
- The **Microsoft Teams** section has been modified to provide additional information on how Teams interacts with third-party accounts.
- We have clarified the **Advertising** section to better show how Microsoft Corporation delivers personalized and behavioral advertising.

October 2021

- We have updated the **Windows section** and other parts of the Privacy Statement to include Windows 11 and enable individuals to understand how Microsoft handles personal data with its version.
- The sections **Products provided by your organization – notices for end users, Other important privacy information** and **Products for businesses and developers** have been modified to reflect changes to Microsoft's commercial agreements.

September 2021

- We have added a link to a new page containing [information for young people](#).
- We have updated the **Edge** section with additional information to clarify how we use and collect data related to search activity in order to improve Microsoft services.

July 2021

- **We have modified the Children's Data Collection** and **Xbox** sections to provide more information about the Xbox experience.
- In the **Activity History** section, we have revised the Privacy Statement to align it with our current practices.

- **We have modified the Cortana** section to better communicate how the digital assistant collects and uses personal data.
- In the Privacy Statement, we have made language changes to clarify our practices.

April 2021

- We have updated the **Microsoft Edge** section to clarify the definition of browsing activity data and to better communicate about controlling browsing activity data in order to personalize Microsoft Edge and Microsoft services.

March 2021

- To better communicate how we handle children's data, we moved the **Children's Data Collection** section up in the Privacy Statement to make it easier to find information, and then expanded that section with additional details, such as information about Xbox profiles.
- We have updated the wording in the **Windows Applications** section to better communicate our data practices in relation to the Photo and Camera applications.
- We have modified the sections **How to access and control your personal data** and **How to contact us** to clearly indicate when we will respond to questions and inquiries.
- We have published the **Enterprise and Developer Products** section, offering more direct access from the privacy statement to the terms of use of the Azure PlayFab service.
- We have modified the **California Consumer Privacy Act (CCPA)** section to provide more direct access from the privacy statement to prior information regarding the California Consumer Privacy Act.

January 2021

- In the **Microsoft Edge** section, we have detailed our privacy practices regarding MSN content accessible via a web browser and the ability to synchronize browser data.
- In the **Personal Data We Collect** section, we have introduced the definition of traffic data to better explain how Microsoft manages data related to its communication services.
- We have modified the **Online Business Services** and **Personal Data Storage and Processing Location** sections to clarify how Microsoft processes personal data in relation to the impact of its legitimate business operations to provide services to business customers.

- We have added a section, **Speech Recognition Technologies**, and made changes to the Privacy Statement to better explain how Microsoft completes automated and manual reviews of the data we process, and, with your consent, reviews voice data for the purpose of creating and improving our speech recognition technologies.
- **The How to contact us** section has been modified to better represent our overall approach to ensuring that people can communicate with Microsoft.
- We've provided a more concise path to learn more about our experiences processing data when using Kinect devices in the **Xbox section**.
- We have updated the **Cortana** section and modified other parts of the Privacy Statement to better illustrate the privacy practices associated with previous and current versions of Cortana.
- **We have revised the Microsoft Translator** section to better explain our privacy practices when the services are used as part of a standalone client application or integrated into other products or services.

November 2020

- **We have expanded the Microsoft 365** section by clarifying our privacy practices related to connected experiences.
- In the **Bing** section, we have provided additional information on how data is transferred to a destination web page when accessing the web page via Bing search results.
- We have reorganized the **Xbox** section with new text to better illustrate our privacy practices.

September 2020

- We have completed the **Xbox and Xbox Live** section by including the Game Pass app and clarifying our process for handling console diagnostic data.
- We introduced the **Surface Duo** section to describe our privacy practices related to the new device.
- We have added additional wording to clarify Microsoft's use of the EU-US Privacy Shield principles in the section "**Location where we store and process personal data**" to clarify that Microsoft does not rely on the EU-US Privacy Shield as a legal basis for personal data transfers due to the EU Court of Justice ruling in case C-311/18.

- We have explained how Microsoft uses cookies and other communication technologies, and how individuals accept and can personally control their use, by providing updates to the **Cookies and similar technologies** section .
- We have added a label to the **Children's Data Collection** section to better illustrate how parents and legal guardians can manage, view, and delete a minor's data.
- We have also improved the wording of the **SwiftKey** section to explain the changes to the technologies and how individuals can customize their use and the data collected.

July 2020

- We have made changes to the Privacy Statement to reflect changes to our Microsoft-branded products and services. For example, we have changed some references from Office 365 to Microsoft 365 to provide greater clarity on how a product handles personal data.
- We have added a new language to the **Microsoft Edge** section to clarify our data management and process practices when Password Monitoring is used and content is downloaded to improve the browsing experience.

June 2020

- We have made changes to the privacy statement to improve its readability and transparency. For example, we:
- Adding additional information on the use of Microsoft services such as Microsoft Teams; and
- Added language specifying how Microsoft handles personal data when Microsoft processes data for legitimate business operations.
- We have clarified how individuals can contact Microsoft to exercise their data privacy rights under the sections of the **California Consumer Privacy Act** and **How to Contact Us** .
- In the **Skype** section , we have updated the language to clarify the service's translation functionality related to **translation features** .
- We have added a section on **Microsoft Teams** describing Microsoft's processing activities specific to the Microsoft Teams experience.
- We have expanded the language in the **Feedback Hub** section to clarify the company's internal activities.
- In the **Windows apps** section , we've added additional labeling to the **camera and photos apps** to describe Microsoft's processing activities specific to the experience.

May 2020

- We have added a section on **HoloLens** to describe our processing activities specific to the HoloLens device and experience.
- We have added a section on **Windows Mixed Reality** to describe our processing activities specific to Windows Mixed Reality experiences.

April 2020

- In the **personal data collected section**, we have added information about personal data collected during in-store events.
- In **How we use personal data**, we have added information on the processing of personal data for price promotions and other in-store events.

February 2020

- In the **California Consumer Privacy Act** section, we have added a link telling you how to use an authorized agent to exercise your rights.

January 2020

- In **the Advertising section**, we have included information about privacy settings in Microsoft Edge related to personalized advertising.
- In **Research, Microsoft Edge, and Artificial Intelligence**, we've added a section specifically for **Microsoft Edge**. The **Microsoft Edge** section contains information on the following:
 - Content that you can save to your device.
 - Option to share browsing history associated with your Microsoft account to improve your web experience.
 - Privacy settings.
 - Collection and use of diagnostic data.
- In **Web browsers: legacy Microsoft Edge and Internet Explorer**, we explained that the section applies to legacy versions of Microsoft Edge.

December 2019

- In **Other Important Privacy Information**, we have added a section on the California Consumer Privacy Act.
- In **How to access and control your personal data**, we have added a link to Microsoft's privacy report which provides aggregate metrics on user requests to exercise their data protection rights.
- In **Products provided by your organization – notice for end users** and **Products for businesses and developers**, we have provided additional information on the processing of personal data of users accessing Microsoft

products with a work or school account, for example, for legitimate Microsoft business operations.

- In **Windows Diagnostics**, we have revised the terminology related to diagnostic activity data levels. Basic diagnostic data is now called mandatory diagnostic data, and full diagnostic data is now called optional diagnostic data.

October 2019

- In **Skype**, we clarified that Microsoft uses voice and text data in the speech recognition feature to provide users with captioning of audio data.

September 2019

- In **Products Provided by Your Organization – Notice to End Users**, we have added information about our handling of students' personal data relating to Microsoft products provided by primary and secondary schools.
- In **Your Phone**, we have included information on how to make and receive calls from your Android phone on your Windows device.

August 2019

- In **How we use personal data**, we explained that we use both automated and manual methods of processing personal data.
- In **How to access and control your personal data**, we have added instructions on exporting your files and Skype chat history.
- In **Windows apps**, we've added information about **Narrator**, a screen reader app that helps you use Windows without a screen.

June 2019

- In **Xbox and Xbox Live**, we have added information regarding the data we collect from Xbox consoles, Xbox apps, and Xbox Live to provide subscription experiences and services.

May 2019

- In **Cortana**, we have added information about how Cortana can interact with other Microsoft products (e.g., Office) and third-party services.
- In **Voice, speech activation, handwriting input and typing**, we:
- We have included information on speech recognition features for HoloLens devices and Windows Mixed Reality.
- added **voice activation** to provide additional information on how (i) applications interact with Windows speech recognition, (ii) Microsoft uses voice data, and (iii) users can turn voice activation on and off.

- In **Camera and Photo apps** , we have included information about the ability to group photos by time, location, tag, and face.
- In **Windows Search** , we've added a **Your Phone** section describing an app that lets you link your Android phone with your Windows device.

April 2019

- In the **Office** section , we have added information regarding connected experiences and the collection and processing of diagnostic data.

March 2019

- In [location], **where we store and process personal data** , we explained that our commitment to the EU-US and Swiss-US data privacy shield infrastructure extends to personal information received from the UK.

November 2018

- In **Entertainment and Related Services** , we have updated **Mixer** to provide more information about user interactions that are visible to the public.

October 2018

- In the section **Reasons why we share your personal data** , we have added an example of sharing certain data with an employer or educational institution, in order to allow them to manage the Microsoft products they provide to you (or to which you sign in with an account they provide).
- In the section **"Where we store and process personal data "** under **"Other important privacy information"** , we have specified that we will cooperate with the data protection and information officer to resolve disputes with residents of Switzerland within the framework of the Data Privacy Framework between Switzerland and the United States.
- In the section **Products provided by your organization – notice to end users** , we indicated that an employer's or school's ability to administer products and accounts may include control over privacy settings.
- In the **Products for businesses and developers** section , we have added PlayFab services as an example of cloud services for businesses and developers.
- In the **Skype** section , we have added a paragraph describing a new subtitling feature.
- In **Windows** , we:
- We discovered how an organization can access data from the Windows devices it manages.

- provided other examples in the description of **the activity history** .
- clarified that **Advertising ID** controls only apply when an application relies on the advertising ID and do not affect other means of delivering interest-based advertising (e.g., cookies).
- Added text in **Diagnostics** describing that diagnostic data can be shared with an organization, for example an employer or school, to facilitate the management of the organization's devices and that aggregated diagnostic data can also be shared with other selected third parties.
- added a new **Feedback Hub** section to describe the collection of feedback and diagnostic data through the application.
- provided several clarifications under **Location services , motion detection , and recording** , notably specifying that Windows will attempt to determine location when you make an emergency call, regardless of your location settings, and that your mobile operator has access to your device's location.
- The descriptions of the **Speech , Ink , and Typing** commands have been modified to improve clarity and provide additional details on the available commands.
- under **browsers—Microsoft Edge and Internet Explorer** , described a unique ID that is sent by the Edge browser to certain selected websites which allows us to develop aggregated data to improve browser features and services, and added a description of a new “website pinning feature to the taskbar”.
- We have made further changes to the privacy statement to improve readability and transparency, and to update outdated links and references.

August 2018

- We have made further changes to the privacy statement to improve its readability and transparency. For example, we have provided more descriptive labels for hyperlinks.
- We have separated the description of the personal data collected by Microsoft for speech recognition from the description of the personal data the company collects for handwriting input and keystroke recognition, and we have simplified them.
- We explained that, in some cases, the ability to access or control personal data is limited, depending on what applicable laws require or permit.

May 2018

- We have made changes to the privacy statement to improve its readability and transparency. For example, we:
- adding new categories of personal data that we collect, such as voice data, content consumption data and browsing history;
- addition of new uses for personal data;
- simplified the text and eliminated repetitions and qualifiers such as "we can";
- adding navigational cues, such as chips, to highlight key points and reduce reader fatigue; and
- Improving consistency in the language used describes similar concepts.
- We have added wording required by the European Union's General Data Protection Regulation (GDPR). For example, we can now:
- describe the rights of individuals to access their data, which apply regardless of location;
- describe the legal bases for Microsoft's data processing, including the provisions relating to legitimate interests under the GDPR and the purposes of our personal data processing; and
- specify the choices users have regarding the sharing of personal data with Microsoft, as well as the consequences of sharing and processing data with Microsoft.
- In the section on **Personal Data We Collect** , we:
- we have added language to direct customers to the appropriate sections of the privacy statement;
- adding new examples of third-party sources of personal data; and
- has updated the descriptions of the types of personal data we collect.
- In the section **"How we use personal data,"** we:
- We explained how Microsoft uses data in general, using the concepts of data taxonomy infrastructure in the international standard ISO 19944;
- we explained our strategies regarding the storage of unauthenticated and authenticated data; and
- We have updated specific descriptions of how Microsoft uses personal data. For example, we have added text to describe how we use personal data for promotional communications and legal compliance, and we have provided information about where Microsoft uses automated systems to process personal data. In addition, we have moved some details about our advertising practices to a separate section under **Other Important Information** .

- In the section **How to access & control your personal data** , we have described how customers can access their personal data and made the text applicable to all customers, regardless of their location.
- In the **Cookies and similar technologies** section , we have updated the description of the cookies used by Microsoft.
- In the section **Notices for end users** , we have specified the cases in which organizations (for example, an employer or a school) have access to an individual's personal data.
- In the **Microsoft Account** section , we explained the differences between the three types of Microsoft accounts.
- In the section **Other important information about privacy** we;
- **We have moved the content of the European Privacy Rights** subsection into the sections **How to access & control your personal data** and **How to contact us** .
- We added a section called **Advertising** , using text from the original section **How we use personal data** , to describe Microsoft's advertising practices and commitments;
- updated information on how Microsoft handles children's personal data';
- explained how and when Microsoft makes changes to the privacy statement;
- identified the Microsoft entities that are data controllers under the GDPR, how to contact us and how to file a complaint.
- In the **Products for Businesses and Developers** section , we have:
- We have described how basic aggregated account information relating to Enterprise Online Services can be shared with authorized partners under certain circumstances.
- We have identified that Microsoft is a data processor under the GDPR when providing Enterprise **Online Services** .
- In the **Office** and **Skype** sections , we described new features and updated how existing functions and features handle personal data. For example, we explain how Cortana works in Skype.
- In **Search and Artificial Intelligence** , we described our latest features and functionalities. For example, in the **Cortana** subsection , we described the personal data Microsoft collects from users who are logged in and out of the service.
- In the **Windows** section , we removed text about a service (Wi-Fi - Connect to suggested open access points) that is no longer available. Under **Web**

browsers , we described the type of browser data that is synchronized across all devices.

- In the **Entertainment and Related Services** section , we have updated the processing of personal data by existing functions and features and provided new information on Xbox, Xbox Live and Mixer.
- We have added a hyperlink to access the privacy policy of our subsidiary **LinkedIn** .

April 2018

- In **the section "Personal Data We Collect"** , we have removed references to the conditions stipulated in the Online Services Terms (OST), as the data definitions have changed in the Online Services Terms of April 2018.
- We have updated the URL pointing to the Law Enforcement Transparency Report in the **Reasons why we share your personal data** .
- In **Cookies & similar technologies** , we have updated the list of pages blocked for our analytics providers.
- In the section **Where we store and process personal data** , we have added more countries where Microsoft operates data centers, and updated the URL to the European Commission's decisions regarding the adequate level of protection for personal data in third countries.
- We have updated our Dublin address in the **How to Contact Us section** .
- In the **Products for Businesses and Developers** section , we have:
 - We removed the subsection for Cognitive Services as we moved Cognitive Services to comply with the same terms as Azure services. For more information, see: <https://azure.microsoft.com/support/legal/cognitive-services-compliance-and-privacy/>
- added references to professional services available under the Online Services Terms.
- added a reference to *personal data* , a new term defined in the Online Services Terms.
- For transparency reasons, we have noted that Bing Search Services, as defined in the OST, uses data as described in the Bing section of this Privacy Statement.
- We have updated the link to the Microsoft SQL Server Privacy Supplement.
- In **Cortana** , we describe how location data collected by Cortana can be used to provide personalized experiences in other Microsoft products.
- In **Windows** , we:

- Adding text to describe new features, such as **activity history** and new features in **Windows Apps** .
- has updated the **Diagnostics** section to (i) provide more information about how Microsoft handles diagnostic data, (ii) describe the new privacy control for handwritten and typed input data, and (iii) provide more information about personalized experiences.

February 2018

- We have added Adjust and ClickTale to the list of analytics providers in the **Cookies & similar technologies** section .

October 2017

- We have made minor changes to the privacy statement to reflect the renaming of our digital and physical stores, now all called "Microsoft Store".
- We have updated the examples of the technical measures we use to prevent the identification of Data Translator processes.
- In **Personal Data We Collect** , we provide more transparency about Microsoft's collection of data related to our *Spend* and Video app.
- In **Cookies and similar technologies** , we describe additional uses of cookies on various Microsoft websites.
- In the section **Where we store and process personal data** , we provide more information on the European Commission's opinion regarding the adequate level of protection for personal data in the countries/regions where Microsoft processes this data.
- In **Microsoft Account** , we have removed information regarding the use of the Microsoft account with social network accounts, as we no longer provide this functionality.
- In **Enterprise and Developer Products** , we provide more information about data collection and processing in enterprise and developer products, including SQL Server.
- In **Windows** , we explain how certain features work in Microsoft Edge and Internet Explorer.
- In addition, we have made minor changes to improve the grammar and clarity of the text.

September 2017

- In the section **Where we store and process personal data** , we have provided more information about Microsoft's compliance with the EU-U.S. Privacy Shield framework and the Swiss-U.S. Privacy Shield framework.

August 2017

- We have updated the preamble to reflect the broad scope of the privacy statement.
- We have modified the navigation in the **product details** to make this information easier to find.
- In the section **"The personal data we collect"**, we have provided more examples of the data we collect from developers and enterprise customers. We have also made changes to better describe the data we collect.
- Under **"How we use personal data"**, we have made changes to be more transparent about how we use the data we collect. We have updated the section on advertising to better describe our advertising practices.
- In **"How to access and control your personal data"**, we've added information on how volume license customers can control their data. We've also indicated that customers can opt out of receiving interest-based advertising from third parties when visiting third-party websites.
- We have updated **Cookies & similar technologies** to be more transparent about our use of cookies and similar technologies.
- We have added a section called **Notices for End Users** to provide more information about the processing of their data to people who have access to Microsoft products through their organization, for example, an employer or a school.
- In **Where we store and process personal data**, we have listed the other countries/regions where Microsoft operates data centers.
- The section **on rights to the protection of personal data in Europe** now only appears in certain European versions of the privacy statement.
- In **Cortana**, we've made changes to better describe how Cortana works. We've also provided more information about how information is processed when Cortana uses a connected service or a third-party skill.
- We have updated the **Skype** section to better describe how certain features work.
- Under **Windows**, we have changed the name of some features.
- We've updated **the "Products for Enterprise and Developers" section** to better describe these products and be more transparent about how we use the data associated with them. We've also updated the name of Dynamics 365.
- In some language versions, we have made grammatical changes and clarifications.

June 2017

- We have updated the **Privacy Shield** section to highlight Microsoft's commitment to the EU-US and Swiss-EU Privacy Shield infrastructure.

March 2017

- We have updated the **Personal Data We Collect** section to provide our customers with greater transparency regarding the third parties who provide us with personal data. In addition, we have made changes to better describe the types of data we collect.
- In **How we use personal data**, we explain to our customers how we use information related to their activities, interests and geolocation in order to offer them a personalized experience.
- In **"How to access and control your personal data"**, we've added information about the new Microsoft Privacy Dashboard, where customers can access and manage their personal data collected from various Microsoft services. We've also added details about users' options for deleting their personal data from other Microsoft properties.
- We have added AppsFlyer to the list of analytics providers in the **Cookies & similar technologies** section.
- We have updated the **Microsoft Account** section to provide customers with information on how our new payment features work.
- We have added a new section called **Privacy Rights in Europe** aimed at informing customers residing in the European Economic Area of their data protection rights.
- In **Where We Store and Process Personal Data**, we provide customers with more information about where Microsoft processes data. We indicate where Microsoft operates its main data centers and explain how we determine where we will process data. In addition, we provide greater transparency about transfers of personal data from the European Economic Area, including the legal basis for such transfers and how we protect customers' rights when their data is transferred in this way. We have declared our commitment to the EU-U.S.-Swiss-U.S. Privacy Shield framework and inform customers about how they can exercise their rights under this framework.
- As we seek to be more transparent about how long we retain personal data, we have set out in the **Personal Data Retention** section the criteria we use to determine retention periods.

- At **Bing** , we explain to our customers how to disable Search Suggestions and inform them about new ways to manage their data. We've also added details about how search data is used for research and development.
- In **Cortana** , we've added information to describe the new features. We explain the variations of Cortana on different operating systems and how Cortana interacts with other services. We've also provided more information about how we use location information. We've moved the information about Cortana's use of data from Microsoft Edge to the **Windows section**.
- In **Microsoft Health Services** , we have made changes for clarity and to take into account new applications in this area.
- We have updated the **MSN** section to better specify the type of data collected in order to provide customers with relevant content.
- In **Office** , we modified the structure of a sentence to make it clearer.
- On **Windows**, we have made a number of changes to improve transparency, describe changes to certain features or new features, and take into account the new privacy measures we have implemented, including:
- Under **Advertising ID** , we explained how customers can control the use of this identifier and provided more clarity on how app developers and ad networks use it.
- We've renamed *Telemetry and Error Reporting* to **Diagnostics** . In this section, we explained the two levels of diagnostic data, including the type of data collected for each level, based on the customer's settings. We also explained the new **Personalized Experiences** setting , which allows users to choose whether diagnostic data is used to personalize their experience.
- We have provided more clarity on the collection of location data in **Windows Location Service** .
- In **Registration** , we described the new features and informed users of their potential legal liability related to the use of this feature.
- In **SmartScreen** , we provided additional details about the data transmitted to Microsoft to help SmartScreen protect customers.
- In **speech recognition, handwriting recognition, and input** , we have better described our speech recognition capabilities and provided more transparency about the data Microsoft collects to deliver these and related services. Furthermore, we have explained to customers the controls available to manage this data.
- Under **Web Browsers** , we removed references to **page prediction** . The page prediction feature still exists in Microsoft browsers. However, browsing

history to power the feature is now collected as part of Windows Diagnostics only from devices configured to return data at the Full level. We have also moved disclosures about Cortana's use of data from this section to the **Cortana** section .

- **We have renamed the Windows Wi-Fi Sense** section to **Wi-Fi Connecting to suggested open hotspots** and modified this section to reflect the rebranding and functionality changes.
- We have clarified **that Wallet** is an application only available for Windows Phone by renaming this section.
- We have added a section for **Windows Media Player** to describe how this feature works for versions of Windows where this application is available.
- We have modified **Windows Search** to describe how the functionality can be used to search for items stored in other services.
- In some language versions, we have made grammatical changes.

February 2017

- In **the section "Personal Data We Collect ,"** we provide more details about the usage data that we consider to be "Product Usage Data."

November 2016

- In **How we use personal data** , we have updated the **Advertising** section to better explain how third parties use your data to personalize the advertisements shown to you.
- In **How to access & control your personal data** , we have updated the **Your communication preferences** section to explain more clearly how to change your preferences.
- In **Other Important Information** , we have updated the section **Where we store and process personal data** to reflect Microsoft's participation in the EU-U.S. Privacy Shield.
- In **Bing** , we removed the Bing Loyalty Program section, as this program has been replaced by Microsoft Rewards.
- We've added the **Microsoft Cognitive Services** section to explain how we collect and use data when developers use the services. We've also clarified that Microsoft Cognitive Services are not Enterprise Products within the scope of this privacy statement.
- We have added the **Microsoft Translator** section , which explains how Microsoft Translator, the collaborative translation infrastructure, and Microsoft Translator Hub collect and use data.

- In **Windows** , we have revised the **Telemetry & Error Reporting** section to indicate that wireless network identifiers are collected with the optional "Enhanced" telemetry level and not the "Basic" level.
- We added the **Subtitles** section in **Xbox** to explain how Microsoft is integrating a speech recognition feature to offer users who want it subtitles for in-game conversations.

September 2016

- In the **Enterprise Products section** , we have added links to privacy notices that still apply to certain business offers.

August 2016

- In the **Personal Data we collect section** , we have added additional examples describing when and what types of usage data we collect.
- In **How we use personal data**
- We explained that only some of our products display ads, that these ads also appear in third-party products, and that we collaborate with third parties, such as AOL and AppNexus, to deliver ads. We also removed an outdated example illustrating data sharing with a service provider for the purpose of displaying ads.
- We have added additional examples of using data to improve products.
- In a **Microsoft account** .
- We have added text explaining the difference between a personal Microsoft account and a work or school account, provided by your school or employer using Azure Active Directory.
- We have added information stating that a third-party product may display your name and username, along with your profile picture, when you sign in to that third-party product using your Microsoft account and agree to share your profile data.
- In **Other Important Information** , we have supplemented the discussion on data transfers from the European Economic Area with our commitment to adopting the new EU-US Privacy Shield. Principles of the EU-US Privacy Shield.
- In **Cortana** , we have provided additional examples of the types of data Cortana can access and use, described a new feature enabling certain functionality without the need to sign in, described new and improved user controls, and added descriptions (already provided to users in the finished product) about data sharing with third-party services that can be used to sign in to Cortana.

- In **Microsoft Health and Microsoft Band** , we've added more details about the types of data these services collect and use, and removed redundant text to simplify the section.
- We have added a new **Outlook** section (incorporating content previously found in a dedicated Outlook.com section and an Office Outlook subsection) to explain the difference between Outlook.com, Outlook apps and related services, as well as to describe new cloud-based features and how Outlook apps can be integrated with multiple accounts via third-party service providers.
- In **Skype** , we have added text explaining that the section in question applies only to the consumer version of Skype and not to Skype for Business; this text describes how to add contacts from other Microsoft consumer services, as well as a new recording feature present in some versions of Skype.
- We have added a new **Store** section , incorporating content previously found in the Windows Store subsection of Windows, and added references to the Xbox Marketplace as well as the Office Store.
- We have added a new **SwiftKey** section to describe our recently acquired SwiftKey applications, incorporating the content of the previous SwiftKey privacy statement.
- In **Windows** :
- We have expanded the description of **the advertising identifier** to provide more details about its roles.
- We have renamed the "Personalizing Inputs" section to **Voice, Handwriting, and Text Input** and added additional examples of the data collected.
- In **Location Services, Motion Detection and Recording** , we have added descriptions of the new **general location** and **default location** settings and provided additional information about when location data is collected and retained by Microsoft.
- We have updated the **Windows Defender** section to explain a new feature that allows you to perform periodic scans using Windows Defender, even if another anti-malware program is running.
- We have revised the section on **error & telemetry reports to further clarify the differences between basic** data , **enhanced** data and **complete** data .
- We have updated the **web browsers: The Microsoft Edge and Internet Explorer section** explains how to control Cortana's access to your browsing history; enabling this feature will allow us to collect your Microsoft Edge

search queries and the complete browsing history associated with your user ID in order to personalize your experience.

- We have updated the **Wi-Fi Assistant** section to clarify that we no longer offer a feature that automatically connects to open Wi-Fi networks.
- We've added a section to **Windows Apps** to describe the Mail and Calendar apps, and updated the Wallet app description to include NFC functionality.
- We have added a new **Enterprise Products** section (which replaces the Business Services subsection of the **Other Important Information** section) to showcase Microsoft products and related offerings, primarily designed for use by professionals and developers.
- Throughout this document, we have replaced the generic term "services" with "products" to better reflect the full range of software, services, and devices that Microsoft offers.
- Throughout the document, we have made minor changes to wording to clarify the meaning, correct typos, grammar mistakes, or other linguistic issues.

January 2016

- We have simplified the introductory paragraph, replacing a list of specific Microsoft services with a reference to the list of services found later in the Declaration.
- In the **Microsoft Account** section, we have added the "display name" item to the means used to find and interact with you within Microsoft services.
- In **Other Important Privacy Information**
- In the section "**Country of storage and processing of personal data**", we indicated that it was possible to store the data in your geographical area, and described the methods of transferring data between the European Economic Area and other countries.
- **We have simplified the "How to contact us" section** by removing the reference to Skype Software S.à.rl
- In **Skype**, we have made several changes designed to simplify and clarify the message, remove redundancies and specify that Microsoft Corporation and Skype Communications S.à.rl are responsible for processing Skype data.
- In **Windows** :
- We have added the **Synchronization settings** section to clarify that Windows synchronization settings apply to Internet Explorer browser history, and that some applications have their own separate synchronization controls.

- We have rewritten the **Telemetry & Error Reporting** section to clarify the different levels of telemetry, describe the types of data associated with each, explain the effect of the controls available to the user, and the limited sharing of error reporting data with partners (such as OEMs) to help them resolve issues related to products and services running on Windows and other Microsoft products and services.
- We have clarified the **Web Browsers** section to present the differences between the functions and synchronization controls on Internet Explorer and Microsoft Edge.
- Throughout the document, we have made minor changes to wording to clarify the meaning, correct typos, grammar mistakes, or other linguistic issues.

October 2015

- We have added examples in the section **"Personal data we collect"** to show you the situations in which we need to collect the contents of files and communications in the course of providing our services.
- The section **"How we use personal data"** has also been enhanced with examples from customer service and product activation, to describe how we use your data to provide and improve our services.
- In the section **"Reasons why we share your personal data"**, we clarified that "communications and documents in private folders" refers to content on cloud services, such as Outlook.com and OneDrive, and not content stored on a user's local device. We also added a link to our law enforcement transparency report.
- In the **Cookies and similar technologies** section, we have added Kissmetrics and Webtrends to the list of data analytics service providers we use.
- We have explained the difference between a personal **Microsoft account** and a work or school account that your organization grants you.
- In the **Other Important Privacy Information** section, we have added the **Business Services** paragraph to inform school and work account holders that the owner of the domain associated with their email address may control and administer their account according to their own policies, which may differ from ours.
- In the **Bing** section, we replaced "Autosuggestion" with "Search Suggestions" and added information on how to unsubscribe from Bing Rewards.

- In the **Cortana** section , we have added "Communication History" to the list of features.
- We have added **Groove Music/Movies & TV** in place of **Xbox Music and Video** to reflect the name change of these services.
- We have added **Microsoft Health Services** to incorporate information previously provided in separate privacy statements on Microsoft Band devices, Microsoft Health apps, HealthVault, and other related services.
- **We have simplified Office, moving relevant information from the old Excel subsection into Search Services .**
- In **Outlook** , we removed **the Social Inbox** .
- In Skype, we have added information about the **translation feature** .
- In Windows, we have added information about **Registration** .
- In **Xbox** , we replaced **Voice Communication** with **Communication Monitoring** . We also indicated that the Xbox Code of Conduct had been replaced with the Microsoft Code of Conduct.
- Throughout the document, we have made minor changes to wording to clarify the meaning, correct typos, grammar mistakes, or other linguistic issues.

July 2015

- We have published a new Microsoft Privacy Statement that consolidates the provisions of many different privacy statements into a single document covering the majority of Microsoft consumer services. This restructuring of Microsoft privacy statements was intended to eliminate redundancies, improve usability, and increase clarity and transparency. We have added elements, such as those related to new features in Windows 10, but the new statement does not represent a complete overhaul of Microsoft's strategy or practices.
